XHLD Gaps Up Again Pre-Market — Thursday's Squeeze Has a Second Act, and a Freshly Effective S-3 Behind It

August 10, 2026 — 8:29 AM EDT · Report #104 · Free Equity Reports Research

◆ DESK TAKE

Gapping ~39% pre-market Monday on heavy volume with no news — pure continuation of Thursday Aug 6's 252% float squeeze, which churned the sub-8M float roughly nine times. Dilution machinery is live: S-3 effective Aug 6, 424B3 filed Aug 7, plus a June offering at \$1.00 sitting well in the money. Watch \$3.60 resistance (pre-market high) and \$2.48 support into the open, with Q2 earnings due before the bell Thursday Aug 13.

DATA BOX

Price	\$2.80
Change	+38.76%
Volume	5.02M
Float	7.79M
Mkt cap	\$33.57M

MECHANICS

Roughly 12M shares outstanding with a ~7.8M float, most of it created by a 7.5M-share offering priced at \$1.00 in late June 2026. An S-3 shelf filed July 24 went effective August 6, with a 424B3 prospectus filed August 7 and a separate 500K-share holder resale registration. The 52-week range (\$0.76–\$13.47) reflects prior reverse-split-adjusted collapse; FY25 net loss was approximately \$19.5M on \$3.1M revenue.

XHLD is bid hard in Monday's pre-market, up roughly 39% from Friday's close with the tape touching the mid-\$3s before settling back near \$2.80.

This is a continuation move, not a fresh story — and as of 8:28 AM ET, there's still no press release or 8-K explaining any of it.

What the record shows

Thursday August 6 was the detonation. The stock gained 252.57% that session, rising from \$0.797 to \$2.81 — with roughly 69 million shares changing hands against a float under 8 million. That's the float turning over close to nine times in one day. Friday August 7 gave back ground, fading from a \$3.53 high to close at \$2.02 on lighter (but still heavy) volume. Classic low-float squeeze mechanics: no news, all supply-and-demand.

What did hit EDGAR is worth more attention than the price action. An S-3 shelf filed July 24 went effective August 6 — the same day the stock ripped — and a 424B3 prospectus followed August 7. The company also filed in late July to register 500,000 shares for resale by holders. None of that is a catalyst. All of it is supply machinery, now live.

The company itself is a Langhorne, PA event-production shop behind the Xyvid Pro platform. Recent tape: it completed the sale of 7.5 million shares at \$1.00 apiece in late June — which is most of the current float — and reported Q1 2026 revenue of \$853,000, up 15.4% year-over-year against FY25 revenue of \$3.1M. Q2 earnings land before the open Thursday, August 13 — the only dated catalyst on the calendar.

The levels

- Support: the pre-market low near \$2.48, then Friday's \$2.02 close. Lose both and this is a completed round trip.

- Resistance: the pre-market high near \$3.60, then Thursday's \$5.42 spike high.
- Volume tell: if the regular session holds above pre-market VWAP on expanding volume, the squeeze has fuel. Fading volume under \$2.50 says the crowd's leaving.

Risk framing: effective shelf plus a sub-\$1 offering six weeks ago means paper can print into any strength, and halts are a real possibility at this velocity. Size accordingly.
